

MS 6428 Configuring and Troubleshooting Windows Server 2008 Terminal Services

Description: This two-day instructor-led course provides students with the knowledge and skills to configure, manage, monitor, and troubleshoot a Terminal Services (TS) environment. The course focuses on configuring of TS core functionality, licensing, Gateway, and Web Access. This is the second course in the Windows Application Platform Services Technology Specialists Who Use Windows Server 2008 curriculum and will introduce the students to the Windows 2008 Terminal Services.

Days: 2

Prerequisites: Before attending this course, students must have technical knowledge equivalent to the following course:

Course 6420 Foundational Series: Fundamentals of a Windows Server 2008 Network Infrastructure and Application Platform
Or
Windows Server 2003 Terminal Server experience in an enterprise environment
Minimum of one year of experience administering and supporting TS
Minimum of one year of experience administering and supporting Windows Server 2003 or Windows Server 2003 R2
Minimum of one year of administering certificate services
Network + certification

Audience: This course is intended for an individual whose primary role is a Technology Specialist in an enterprise environment. Also, individuals who are assuming a new role requiring skills to manage connections served by a terminal server session over the intranet, extranet, and Internet would be interested in this course.

Module 1: Configuring Terminal Services Core Functionality

This module explains how to install TS and configure core functionality.

Lessons

- Configuring TS Role
- Configuring TS Settings

Lab : Configuring TS Core Functionali

Module 2: Configuring and Managing Terminal Services Licensing

This module explains how to configure and manage TS Licensing.

Lessons

- Configuring TS Licensing
- Managing TS Licenses

Lab : Configuring and Managing TS Licensing

Module 3: Configuring and Troubleshooting Terminal Services Connections

This module explains how to configure and troubleshoot connection properties using TS.

Lessons

- Configuring TS Connection Properties
- Configuring TS Properties Using Group Policy
- Troubleshooting TS

Lab : Configuring and Troubleshooting TS Connections

Module 4: Configuring Terminal Services Resources

This module explains how to configure TS Easy Print and TS RemoteApp.

Lessons

- Installing Applications
- Configuring Remote Applications
- Configuring Printers

Lab : Configuring TS Resources

Module 5: Configuring Terminal Services Web Access

This module explains how to configure TS Web Access.

Lessons

- Installing the TS Web Access Role Service

Lab : Configuring TS Web Access

Module 6: Configuring Session Broker

This module explains how to configure TS Session Broker.

Lessons

- Configuring a TS Session Broker for a Load-Balanced Farm

Lab : Configuring a Session Broker

Module 7: Configuring and Troubleshooting Terminal Services Gateway

This module explains how to configure and troubleshoot TS Gateway.

Lessons

- Configuring TS Gateway
- Troubleshooting TS Gateway Connectivity Issues

Lab : Configuring and Troubleshooting TS Gateway

Module 8: Managing and Monitoring Terminal Services

This module explains how to manage and monitor TS connections post installation and configuration. The students will also be introduced to configuring WSRM for TS.

Lessons

- Managing Current TS Connections
- Monitoring TS Connections
- Configuring WSRM for TS

Lab : Managing and Monitoring TS

Upcoming Classes

Jun 14, 2012 - Jun 15, 2012

Jul 05, 2012 - Jul 06, 2012

Sep 06, 2012 - Sep 07, 2012
